2022 - Present

I joined dezhoosh and work in the design and development of smart home devices.

● Data Analyst, in IOT Projects

2024 - Present

I analyze data generated from devices and sensors and help companies do the same.

About Me

I am Masih Chatraei. I have been interested in the world of technology since the age of 14 and entered the world of programming. Initially, I moved towards programming hardware microcontrollers and gradually moved towards the Internet of Things and building smart systems. Recently, I entered the world of artificial intelligence and analyze the data obtained with the Internet of Things with data science.

Education
